

Engineering Manager / Lead Developer (LAMP)

POSITION:

We seek an Engineering Manager/ Lead Developer to be responsible for vision, development, maintenance and enhancement of our SaaS product offerings. This role will be a blend of hands on development, architecture, and managing 2 junior developers. The right candidate will have strong hands-on development experience in a LAMP environment. You will work with end users to gather and translate requirements, therefore excellent analysis and communication skills are a must.

COMPANY:

Field Automated Communications Systems is a fast-growing provider of software to public agencies (states, cities, counties) and the civil engineering firms that serve them. We are a premier provider of web-based, SaaS Construction Management and Project Controls solutions. We have clients across the country. Our company is private and doing great even in these uncertain times.

SPECIFIC DUTIES:

- Contribute to key architectural decisions and collaborate with other developers to design complete solutions.
- Generate Development Plans, Schedules and Estimates
- Design, Code, Test and Document your development projects
- Manage and mentor 2 junior developers
- Collaborate with clients and internal teams to understand and document software requirements
- Plan, coordinate, and execute release plans, unit testing and QA

MINIMUM REQUIREMENTS:

- Minimum five (5) years experience with technologies detailed below:
 - >Application development on a LAMP stack
 - >PHP programming with heavy SQL database access & manipulation
 - >SQL database design
 - >HTML, XML, and Javascript programming
- Bachelors or higher in CS/EE or related technical field
- At least five (5) years of experience building web-based enterprise business software
- Previous supervisory experience
- Strong systems analysis and systems design skills.
- Excellent oral and written communication skills.
- Strong project management skills, with proven track record of delivering projects

DESIRABLE EXPERIENCE:

- PostgreSQL
- Actionscript/ Flex
- Linux system administration
- Unix shell scripting

**** ONLY BAY AREA CANDIDATES WILL BE CONSIDERED ****

We offer a comprehensive compensation and benefits package including competitive salary, profit sharing plus medical and dental insurance. To apply, send resume to jobs@facsware.com.
